

Geography

Geography pupils study people, places and environments - at a range of scales. Pupils develop a curiosity about the world around them and make links with people and places in the wider world. They know that their actions have local and global consequences.

Geography is taught in a themes based approach such as “Threatened World”, incorporating human, physical and environmental studies of the world we live in.

Year 7

- My Local Environment
- UK/Europe
- Water – Rivers & Coasts
- My Global Footprint & Environmental Issues
- Weather & Climate & Local Fieldwork
- Interesting Places - (including National Parks & Glaciation)
